Q.2) Short answer questions:

1) what are the advantages and disadvantages of using third generations computer.

⇒ The third generation computer time period was 1964-1975.

Integrated Circuits (IC) were used in third generation computers. The first practical IC's were invented by "Jack Kilby" & by "Texas Instrument" & Robert Noyce at Fairchild Semiconductor. Transistors were miniaturized & placed on silicon chips, called semiconductors, which drastically increased the speed & efficiency of computers.

New input & output devices like visual display unit and high speed printers were introduced. The speed of the computer of

the Computer was further improved and allowed more than one program to run at the same time (multi-processing). Computers for the first time became accessible to a mass audience.

• Advantages of Computer:

- 1) Better Storage Capacity and used Magnetic disk/tape drives.
- 2) It used both languages both Machine and assembly level.
- 3) The accuracy of these Computers was improved.
- 4) Usage of keyboards and Monitor for input purposes was introduced.
- 5) Maintenance cost was reduced.

• Disadvantages of Computer:

- 1) It required air conditioning for the cooling purposes in the Mainframes.
- 2) The technology used was highly sophisticated for the manufacturing purpose of integrated circuits.

3) The integrated Circuits were difficult to repair.

4) The Computers were costly.

5) The I.C. was very complicated and specialised workers

④ were required for it.

2) State uses of Computers.

⇒ Computer is very useful in walks of life. Computer uses are many. Following are some uses of Computer.

2. Business uses: In business it plays vital role. it provide information of various works. A Computer has high speed of calculation, diligence, accuracy, reliability, or versatility which

has made it an integrated part in all business organizations. It is also used to type official letters, maintain file in proper order, Profit and loss, payment of workers etc.

3. Research Project: Computer plays vital role in research projects. It is used to make different types of diagram easily. It is used to make all help in founding the types of disease easily.

4. Hospitals: Computer plays vital role in hospitals and health departments. All information about patients are stored in computer. It is used to founding various medicine.

5. In Reservation Systems: Main frame type of computer are used in Railway reservation. In this system computer plays vital role and it also save time. In this way we can do reservation
